Sports Medicine

November 2005

Dear ATEP Alumni and Friends -

I am pleased to offer this letter in support for the ATEP Alumni and Friends fund raising efforts. As the Medical Director for the Athletic Training Education Program I have the opportunity to see first hand, the progress made in our educational efforts. This is an exciting time for athletic training education at UW Madison. There are many initiatives underway that are in need of support. Especially exciting is the new joint effort with the Wisconsin Alumni Association to offer scholarships specifically for Athletic Training students. This will mark the first time that scholarships will be specifically provided to Athletic Training students. It is my understanding that the first scholarship will be given in honor of Gordon Stoddard.

I have pledged \$500 toward this important endeavor. I hope you will consider a gift, no matter how small, toward our new scholarship fund.

Sincerely yours,

Gregory L. Landry, M.D.
Professor of Pediatrics and Sports Medicine
